# Handling and Disposal of Universal Waste on University of South Alabama Campuses

(Regulated by EPA, ADEM and TSCA under 64 FR 36466 & 70 FR 45508)

Universal waste means any of the following hazardous wastes that are subject to the universal waste requirements:

Batteries Bulbs Ballasts Mercury-containing equipment Pesticides Aerosol cans

Some states classify electronic scrap, motor oil and ballast

Reviewed & Revised: January 2022

## TYPES OF UNIVERSAL WASTE AND PACKAGING REQUIREMENTS:

## **BATTERIES**

Lead-acid (wet & dry) Ni-Cad Mercury Alkaline Lithium

Nickel metal halides Magnesium Silver oxide Carbon Zinc Uninterrupted power supply

sources

All batteries must be packaged for transportation in a manner that prevents short circuiting and damage to the battery  $\frac{1}{2}$ 

surrounding environment. Storage of these devices must be in a structurally sound, sealable plastic container and be labeled with "Universal Waste-Mercury Containing Devices."

#### **PESTICIDES**

The University handles this type of materials as a lab-pack waste, on a case by case basis, but these materials must be handled in such a manner that prevents breakage/leakage and release to the surrounding environmental.

The best method of handling these materials is to purchase only what is needed at the time.

## **AEROSOL CANS**

Aerosol cans have only recently become an EPA-regulated Universal Waste
