

In the event of a spill:

- x If a biohazardous material spills on you, remove contaminated clothing. Wash any exposed body parts.
- x If a biohazardous material gets in your eye, flush at the eyewash station.
- x If the spill area is large or in a common use area, mark the area so that others may avoid it.
- x Using materials from your spill kit:
  - o Don the appropriate PPE
  - o Cover the spill with absorbent material
  - o Pour disinfectant over the entire area and allow to stand for 30 minutes.
- x Contact the PI and assess the magnitude of the spill and formulate further plans of action.
- x Safely pick up any broken glass with tongs or
